[4] Water (WR)

[4.2] Water Recycling Program Implementation

Water Plant

Schematic of rain water recycle and treatment program

Main water tank inside the campus

Example of Water Recycling Program (University of Thi-qar)

The University of Thi-Qar has a water plant station to treat the water from the near river and recycle rainwater on campus during the rain season. This water plant sends the treated water to an ample water tank storage. The service department of the campus distributes treated water to small tanks for every building inside the campus. This water is used for garden sprinklers, drinking after another treatment, and human uses.
