

interdisciplinary research(University of Thi-Qar)

1. Does your institution have measures of interdisciplinary research success within applicable disciplines?

The University of Thi-Qar employs several measures to assess the success of interdisciplinary research across its various disciplines:

- **Scientific Research Indicators:** The university analyzes its scientific research performance using metrics from repositories like the Web of Science (WOS). A symposium organized by the **Department of Scientific Affairs** focused on evaluating these indicators, emphasizing criteria such as international awards, citation ratios, and publications in top-tier journals. The event also highlighted the importance of forming multidisciplinary research teams to enhance research quality and elevate the university's academic standing.

- **Strategic Plan (2021–2026):** The university's strategic plan outlines objectives to market applied research and support creative and innovative applied studies. Success indicators for these initiatives include the number of completed applied research projects, the extent of research commercialization, and the volume of creative and innovative studies produced.

These measures reflect the University of Thi-Qar 's commitment to fostering and evaluating interdisciplinary research success within its academic community.

2. Does your institution provide specific physical facilities for interdisciplinary research teams within applicable disciplines?

The University of Thi-qar provides specific physical facilities to support interdisciplinary research teams across various disciplines. Notable examples include:

Marshes Research Center - University of Thi-qar : The Marshlands Research Center was established at Thi Qar University in 2004. The Marshlands Research Center is a specialized scientific center concerned with everything related to the marshlands environment and what contributes to preserving its biodiversity. The center currently includes the following departments:

- 1- Soil and Water Department
- 2- Environment and Pollution Department
- 3- Marshlands Development and Improvement Department.

The department of Soil and Water currently includes two laboratories: the soil and water laboratory and the general analysis laboratory. It is equipped with a number of laboratory devices such as the atomic absorption device, the multi-parameter water quality sound device, a number of incubators, ovens, balances, and other devices for use in various analyses by researchers and graduate students.

The Environment and Pollution department currently includes two laboratories: an environment and pollution laboratory and an aquatic biology laboratory. It is equipped with a number of laboratory devices such as the atomic absorption device, the multi-parameter device, a number of incubators, ovens, balances, and other devices for use in various analyses by researchers and graduate students. <https://mrc.utq.edu.iq/>

Thi Qar Center for Historical and Archaeological Studies: This center serves as a platform for interdisciplinary research in areas such as Antiquities studies, Historical studies, and policy analysis. It organizes seminars, workshops, and conferences that bring together experts from various fields to address different topics. <https://chsa.utq.edu.iq>

3. Does your institution provide specific administrative support for interdisciplinary research teams within applicable disciplines?

The University of **Thi-qar** demonstrates a commitment to interdisciplinary research through several initiatives:

- **Research Centers and Institutes:** The university has established various research centers and institutes that serve as platforms for faculty and students to engage in collaborative projects across diverse fields. <https://utq.edu.iq/>
- **Department of Scientific Affairs:** This department supervises and follows up on all scientific priorities within the university, encompassing areas such as scientific research documentation, curriculum development, and the coordination of research centers and scientific development activities.
 - <https://utq.edu.iq/sci-aff/>
- **Strategic Plan (2021–2026):** The university's strategic plan emphasizes marketing applied research and developing scientific research directed at serving the community. This includes fostering collaboration with public and private sector institutions and supporting creative and innovative applied research. <https://utq.edu.iq/gaa/>

While specific administrative structures dedicated solely to interdisciplinary teams are not explicitly detailed, these initiatives indicate that the University of **Thi-qar** provides support for interdisciplinary research through its established centers, departments, and strategic objectives.

4. Does your institution have a tenure or a career promotion system in place that recognizes interdisciplinary research within applicable disciplines?

The University of **Thi-qar** has established a structured promotion system that evaluates faculty members based on their research contributions, teaching performance, and service to the university. While the specific promotion criteria emphasize the originality and quality of research, there is no explicit mention of interdisciplinary research being a distinct factor in the promotion process. For instance, the College of Medicine outlines detailed requirements for promotion to professorship, focusing on the number and quality of research papers, teaching contributions, and other academic activities.

<https://prom.rdd.edu.iq/start.aspx>

In summary, while the University of **Thi-Qar** 's promotion system recognizes and rewards high-quality research and academic contributions, there is no explicit indication that interdisciplinary research is separately acknowledged within the current promotion criteria.
